*In computer science and information science (CS/IS) research, top-tier conferences are highly selective venues for archival papers only, comparable to journals in other disciplines for their selectivity, visibility, and impact. Thus, the majority of my research is published in conference proceedings.*

*Authors are typically ordered such that leading students are listed from largest to smallest contribution from the left. Supervising faculty and postdocs are typically ordered from the right. The last author is the primary sponsor and supervisor.*

*\* indicates equal contributions, usually for co-first or co-last authors.*

*† indicates current or former PhD students, research interns, or visiting scholars directly supervised by me.*
